QUICK STATS SECTION

Card 1:

- Title: 3 Published Reports
- Description: Comprehensive equity research across FMCG, renewable energy, and pharmaceuticals using rigorous valuation methodologies.

Card 2:

- Title: 112-Person Market Research Survey
- Description: Designed and executed quantitative research on financial literacy and investment behavior among college students.

Card 3:

- Title: ₹50Cr+ Portfolio Experience
 - Description: General Manager at Walford Capitals AI-powered PMS. Built portfolio monitoring frameworks and investor communication systems.
-

REPORT CARDS SECTION

Headline: Recent Reports

Report Card 1:

Title: Nestle India Limited

Industry: FMCG / Consumer Staples

Thesis: Market leader with strong brand moats, but trading at 85x P/E—a significant premium to peers. Operational efficiency deterioration and working capital stress warrant caution despite quality fundamentals.

Key Metric: CMP ₹2,376.80 | Target ₹1,587.50 - 1,987.50 | REDUCE

Button: [Read Full Report](#)

Report Card 2:

Title: Waaree Energies Limited

Industry: Renewable Energy / Solar Manufacturing

Thesis: India's largest solar module manufacturer with exceptional growth momentum (529.79% CAGR). Strong tailwinds from India's 500 GW renewable target, but supply chain concentration and export dependency create headwinds.

Key Metric: CMP ₹3,197.00 | Target ₹2,656.43 - 3,288.32 | HOLD

Button: [Read Full Report](#)

Report Card 3:

Title: The Semaglutide Patent Cliff

Industry: Pharmaceuticals / GLP-1 Therapies

Thesis: India's semaglutide patent cliff (March 2026) represents a structural inflection point for domestic pharma. 60-70% price reduction will unlock 3-5x market expansion and ₹1 billion+ annual opportunity for generic manufacturers.

Key Metric: Industry Note | Event-Driven | March 2026

INDIVIDUAL REPORT PAGES

REPORT 1: NESTLE INDIA

Page Title: Nestle India Limited Equity Research Report

Tab 1: Summary

Investment Thesis: Nestlé India is a market-leading FMCG compounder with durable competitive advantages: Maggi's dominance in instant noodles, strong brand equity across beverage and confectionery, and unparalleled retail distribution (3.5M+ outlets). However, the stock trades at 85x P/E—a 37% premium to peer median of 61.5x—offering limited margin of safety. Recent deterioration in operational efficiency (inventory turnover -16%, trade receivables -23%) and rising leverage (Debt-Equity 0.1x → 0.3x) signal working capital stress. While the company remains a quality compounder, valuation and operational headwinds warrant caution.

Key Takeaways:

- **Market Leadership:** Strongest brand portfolio in organized FMCG; 45% revenue from iconic Maggi brand
- **Valuation Premium:** Trading 37% above peer P/E median on quality, but limited margin of safety
- **Operational Deterioration:** Working capital metrics deteriorating; current ratio fell to 0.80 (below 1.0 is red flag)
- **Strong Cash Generation:** Operating cash flow ₹46,719 Cr (23% of sales) demonstrates underlying business strength
- **Recommendation:** REDUCE at ₹2,376.80 | Target ₹1,587.50 - 1,987.50 | Accumulate on weakness below ₹2,000

Key Metrics:

Metric	Value
Market Cap	₹2,29,160 Cr
P/E Ratio	85.2x (vs. peer median 61.5x)
ROE	108.9%
Debt-to-Equity	0.3x
Current Ratio	0.80
Operating Margin	21.47%
Dividend Yield	1.14%

REPORT 2: WAAREE ENERGIES

Page Title: Waaree Energies Limited Equity Research Report

Tab 1: Summary

Investment Thesis: Waaree is India's largest solar module manufacturer with exceptional growth momentum: 529.79% revenue CAGR from FY20-FY25, 13.3 GW installed capacity, and 44% share of India's solar module export market. The company is well-positioned to benefit from India's ambitious 500 GW renewable target by 2030 and strong government support (PLI schemes, GST benefits). However, three critical risks demand attention: (1) Supply chain concentration—87.87% of material costs from China/Malaysia/Thailand; (2) Export dependency—57.14% revenue from USA; (3) No dividend policy despite consistent profitability. At current valuation (6.5x TEV/Revenue, 34.7x TEV/EBITDA), the stock is fairly valued relative to peers, offering limited upside without near-term catalysts.

Key Takeaways:

- Market Leadership: Largest solar module manufacturer in India with 13.3 GW capacity; 44% export market share

- Explosive Growth: 529.79% revenue CAGR (FY20-FY25), 108.35% net profit CAGR demonstrates exceptional scaling
- Favorable Tailwinds: India's 500 GW renewable target, government PLI schemes, and rising global demand for green energy
- Supply Chain Risk: 87.87% of material costs from China/Thailand/Malaysia creates geopolitical and price volatility risk
- Export Concentration: 57% revenue from USA creates tariff and trade policy risk
- Recommendation: HOLD | Target ₹2,656.43 - 3,288.32 | Accumulate on weakness below ₹2,800

Key Metrics:

Metric	Value
Revenue (FY2025)	₹12,764.55 Cr
Revenue Growth	19.10%
Net Profit	₹1,781.17 Cr
Operating Margin	19%
Installed Capacity	13.3 GW
Market Share (India Export)	44%
Current Market Cap	₹94,531 Cr
P/E Ratio	47.0x

REPORT 3: SEMAGLUTIDE PATENT CLIFF

Page Title: The Semaglutide Patent Cliff | Industry Note

Tab 1: Summary

Investment Thesis: India's semaglutide patent cliff—driven by the expiry of Novo Nordisk's final device/formulation patents in March 2026—represents a rare confluence of large addressable market, timing clarity, and manufacturing readiness. The transition from innovator monopoly to generic competition is expected to compress treatment costs by 60-70% (from ₹17,000-25,000 to ₹5,000-8,000 per month), unlock a 3-5x expansion in the addressable patient base, and generate ₹1 billion+ in annual market opportunity. Dr. Reddy's, Sun Pharma, and Zydus are manufacturing-ready for immediate post-patent launches. This represents one of the most significant generic market openings in recent Indian pharma history.

Key Takeaways:

- Patent Architecture: Novo Nordisk used layered patents (molecule → formulation → device) to extend exclusivity until March 2026
- Market Opening: Final patent expires March 2026; generic launches expected Q2 2026
- Price Reduction: Expected 60-70% price cut (₹17,000-25,000 to ₹5,000-8,000/month) will unlock middle-income patients
- Market Expansion: 60-70% price reduction expected to expand GLP-1 patient base by 3-5x (from ~5M to 15-25M patients)
- Addressable Market: ~90 million diabetes patients + 200+ million overweight/obese adults in India
- Revenue Opportunity: Investment banks estimate India's GLP-1 market could reach ~USD 1 billion annually post-entry
- Key Beneficiaries: Dr. Reddy's (early mover, manufacturing since Apr 2025), Sun Pharma (distribution scale), Zydus (device innovation)

Market Timeline:

- 2024: Molecule patent expires; Dr. Reddy's receives manufacturing approval
- 2025 Q2: Dr. Reddy's begins production; exports commence
- 2026 Q1: Final device/formulation patent expires (March 2026)
- 2026 Q2: Generic launches by Dr. Reddy's, Sun Pharma, Zydus
- 2026-27: Export markets open; market consolidation begins

ABOUT PAGE

Page Title: About Khushi

Main Bio:

I'm Khushi Bansal, a final-year BBA student at BVIMR, graduating June 2026. I'm passionate about rigorous financial analysis, equity research, and understanding how capital markets price opportunity and risk.

My background combines practical startup experience with deep research skills. I've worked as General Manager and Equity Research Analyst at Walford Capitals, an AI-powered portfolio management startup, where I conducted due diligence on 20+ companies, built portfolio monitoring frameworks for ₹50Cr+ AUM, and authored three comprehensive equity research reports.

I'm particularly interested in research-focused roles where I can deepen sectoral expertise, contribute rigorous analysis, and help investors make informed decisions. My medium-term goal is to pursue a Master's in environmental economics or sustainable finance from Oxford or LSE, combining my passion for research with focus on climate finance and impact investing.

This portfolio showcases my analytical approach: rigorous financial analysis, clear investment theses, and actionable insights.

Background Cards:

Card 1: Education BBA | Bharati Vidyapeeth Institute of Management & Research (BVIMR) New Delhi | Graduating June 2026 | CGPA: 8.01/10

Relevant Coursework: Financial Modeling | Investment Banking | Financial Markets | Cost Accounting | Python & Statistics | Research Methodology

Card 2: Work Experience General Manager + Equity Research Analyst | Walford Capitals (AI-Powered PMS) Aug 2024 - Present | Work From Home

- Led recruitment for 20+ team members; structured hiring and onboarding processes
- Built portfolio monitoring framework with NAV reconciliation and risk tracking
- Authored 3 equity research reports using CCA methodology
- Conducted due diligence on 20+ portfolio companies
- Managed 40+ investor relationships and quarterly communications

Card 3: Research & Internship Marketing & Finance Intern | Agile Capital Services | Jun-Jul 2025 Student Ambassador | Internshala | Jun-Jul 2024

- Designed and executed market research survey on financial literacy (112 responses)

- Conducted ratio analysis on insurance companies (ICFL, SBI Life)
 - Pitched financial products to personal network; gained product knowledge
-

IMPORTANT NOTES FOR YOUR MATE

1. Colors:

- Primary Blue:
- Dark Gray:
- Light Gray:
- Border:

Keep it minimal. No loud colors.

2. Typography:

- Use system fonts (Inter, -apple-system, sans-serif) for fast loading
- No custom fonts unless necessary
- Body text 16px, line-height 1.6

3. PDFs:

- All 3 reports should be optimized (compress to <10MB each)
- Store in /public/pdfs/ folder
- Link in next.js: `<a href="/pdfs/report-name.pdf" target="_blank">Download</a>`

4. Images:

- Professional photo optional (not required)
- If using: optimize to <200KB
- Company logos (Walford, etc.) optional but nice to have

5. Contact Form:

- Use Vercel serverless function (Node.js) + nodemailer or SendGrid
- Test form before launch
- Add honeypot field to prevent spam

6. Mobile Testing:

- Test on iPhone (Safari) and Android (Chrome)
- Ensure PDFs open properly on mobile
- Forms should be easy to use on small screen

7. Performance:

- Lighthouse score should be 90+
- LCP < 2.5s
- No unnecessary libraries
- Cache PDFs

8. Deployment:

- Use `next build && next export` for static export, OR
- Use Vercel deployment (1-click if using Next.js)
- Environment variables for email service

9. Domain:

- Default: yourname.vercel.app works fine
- Custom domain: optional but professional (khushibansal.com)
- Setup via Vercel dashboard

10. Launch Checklist:

- ☐ Navbar working on mobile
- ☐ All links clickable
- ☐ PDFs download/open properly
- ☐ Contact form sends email
- ☐ Mobile responsive tested
- ☐ No broken images
- ☐ Meta tags set
- ☐ Google Analytics (optional)
- ☐ Vercel deployment successful
