

OBJECTIVE

Equity Research Analyst offering a rigorous fundamental approach to corporate valuation, financial modeling, and sector-specific thesis generation. Proven ability to construct complex 3-statement models, synthesize quantitative market data, and deliver high-conviction, institutional-grade investment insights.

PROFESSIONAL EXPERIENCE

Walford Capitals

August 2024 – Present

Equity Research Analyst

- Published high-conviction initiation coverage on mid-to-large cap Indian equities (Nestle India, Waaree Energies) and thematic industry reports (Semaglutide Patent Cliff).
- Constructed comprehensive 3-statement operating models, DCFs, and Sum-of-the-Parts (SOTP) valuations to derive non-consensus price targets and identify asymmetric risk/reward profiles.
- Conducted rigorous fundamental analysis across FMCG, renewable energy, and pharmaceutical sectors; synthesized competitive dynamics, unit economics, and margin drivers to inform institutional investment strategies.
- Engineered robust financial data templates in Excel, integrating historical financials, management guidance, and macro-economic assumptions to standardize peer comparison frameworks.

General Manager

October 2024 – June 2025

- Spearheaded human capital allocation by structuring the recruitment pipeline and onboarding architecture for a 20+ member cross-functional team.
- Developed institutional-grade investor materials, including executive summaries and pitch decks, successfully deployed to 40+ high-net-worth potential investors.

Agile Capital Services

June 2025 – July 2025

Marketing and Finance Intern

- Executed fundamental and ratio analysis on leading financial institutions (IFL and SBI Life Insurance) to assess asset quality, capital adequacy, and profitability metrics.

- Structured and analyzed a quantitative market research survey evaluating the correlation between financial literacy and retail investment behavior.
